

# Job description

## Smaller caseload (25 billable hours)

A Rise Up For Autism Board Certified Behavior Analyst (BCBA) is responsible for evaluation, creation, and implementation of ABA Therapy plans, accurate and reliable data collection, consultation, and training with family and staff. Therapy is provided either in the individual's home and/or at one of Rise Up For Autism's clinics. Our goal is to set learners up for success by developing positive behaviors and life skills using Applied Behavior Analysis (ABA).

BCBAs are responsible for enforcing standards for ABA Therapy to maintain Rise Up For Autism's high quality of care for clients and families.

- Write and modify initial treatment plans, behavior plans, crisis plans and support plans for RUFA clients as needed.
- Develop and implement skill acquisition plans that teach functional skills within the home, classroom, or community.
- Seek input and maintain effective communication with families, teams and outside entities.
- Develop individualized programming for children that achieve meaningful clinical outcomes.
- Train existing R/BT's on program implementation and model basic strategies for behavior
- support within the home and community environment.
- Generate quarterly progress reports for RUFA Families.
- Collaborate and communicate with relevant RUFA staff to ensure effective and efficient implementation plans.
- Coach, mentor, and develop RBTs in providing high quality care.
- Provide RBT certification training and maintain supervision and parent training for ~25-30 hours per week.
- Develop role-appropriate leadership skills that complement clinical competencies.

## Qualifications:

- National Certification by Behavior Analyst Certification Board (BACB).
- Master's Degree required in relevant field from an accredited University.
- Completion of eight (8) hour online Supervisor Training and complete required CEUs.

- Ability to lead a team and supervise therapists.
- Familiarity with relevant diagnostic tools and procedures.
